

**Utah Statewide Immunization System (USIIS)
Monthly Report for February 2002**

HEDIS Reporting: Several health plans have renewed their agreements with USIIS. Health plans participate with USIIS to assist them in data collection for Health Employer Data and Information Set (HEDIS) reporting. **Contact Sandra Schulthies at 801-538-6114.**

Provider Enrollment: During the month of February Willow Creek Pediatrics was enrolled and trained. Also enrolled with training pending are Hunter Medical and Jordan Meadows. Kamas Health Department has changed from KIDS to WebKIDS. **Contact JC Alexander at 801-538-6827.**

Internet Explorer: The USIIS Technical team is very excited to announce that users are now able to use WebKIDS on Internet Explorer (IE) 5.0 or higher. This breakthrough is due to a new Java Plug-in (Java JRE 1.3.1_2) that was released a few weeks ago. IE users will need to download this Plug-in and check to see if the Cipher Strength is at 128-bit encryption. **Contact the USIIS Help Desk at 801-538-6872.**

New Addition: Christine Perfili and her husband are the proud new parents of a son born February 17, 2002. Christine will be out of the office until September. Marketing-related issues may be conveyed to: **Nancy Paré at 801-538-6871.**

USIIS Roll-out Committee: This group met in January and late February to develop and implement a plan to enroll private providers in the USIIS program. Obstacles, benefits and use of sales experts and peers to promote the program have been discussed. **Contact JC Alexander at 801- 538-6827.**

USIIS Reports: The USIIS technical team has been working very hard to make a complete change-over to Actuate Reports. WebKIDS reports have all been changed to Actuate with the exception of the Doses Administered Report. A target date of April 1, 2002 has been established to move the new Doses Administered Report into production. This will allow users to submit the VFD Report online (and paperless). **Contact Joe Nay at 801-538-7008 or jnav@doh.state.ut.us.**
